#### 8.2. Exposure controls

Engineering measure(s) : Provide adequate ventilation. Use only in area provided with appropriate exhaust

ventilation. Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Organisational measures to

prevent /limit releases, dispersion and exposure. See also section 7.

Personal protective equipment : Choose body protection according to the amount and concentration of the

dangerous substance at the work place.

Hand protection : Protective gloves complying with EN 374. The selection of specific gloves for a

specific application and time of use in a working area, should also take into account other factors on the working space, such as (but not limited to): other chemicals that are possibly used, physical requirements (protection against cutting/drilling, skill, thermal protection), and the instructions/specification of the supplier of gloves.

Eye protection : tightly fitting safety goggles /. Safety glasses (EN166)

Respiratory protection : Not required for normal conditions of use. In case of insufficient ventilation, wear

suitable respiratory equipment. Full face mask (EN 136) (EN 136). Half-face mask (DIN EN 140) (EN 140). Filter type: A (EN 141). Self-contained breathing apparatus

(EN 133).
